

Lab 1: Basics of Programming with Python

Name: Nasser Asaad Alyousef

Student ID: 2240002150

In this lab I set up Python with Jupyter and the image libraries (NumPy, OpenCV, Pillow, Matplotlib). I loaded and displayed images with both OpenCV and PIL, saved them to disk, and printed them as NumPy arrays to see how an image is stored as pixel values. For the assessment I used NumPy to compute statistics, crop, flip, transpose, rotate, brighten and mask the image.
