

Lab 2: Digital Image Fundamentals

Name: Nasser Asaad Alyousef

Student ID: 2240002150

In this lab I studied image sampling and quantization by downsampling an image and reducing its gray levels, and I observed that stronger sampling loses detail while fewer levels causes false contours. I then performed arithmetic operations on two images (addition, subtraction and adding the constant 175, using saturation to avoid wrap-around) and set operations on grayscale images (union, intersection, set difference and symmetric difference).
