

## Lab 4: Intensity Transformations and Spatial Filtering

**Name:** Nasser Asaad Alyousef

**Student ID:** 2240002150

In this lab I applied fixed-value thresholding at several levels to turn a grayscale image into a binary image. I then worked with histograms on the moon image: contrast stretching using the 2nd to 98th percentiles and the 3rd to 80th percentiles, and histogram equalization with `exposure.equalize_hist`. Finally I matched the histogram of the Chelsea image to the rocket reference image, so Chelsea took on the color distribution of the reference.
